The manual press MCP5 in combination with the corresponding die set provides maximum termination reliability and a significant reduction in flat cable assembling time.

Manual Termination Press and Die Set

Description	Series	Part Number
Manual Press	All	MCP5
Die Set Including Termination	050	CPD64F50FM
	056	CPD64F52PM
	057	CPD64F50HM

Compact air operated bench press. Operator manually leads sockets and inserts flat cable laterally into socket and actuates the press with a foot switch. Operates on 85-95 psi non-lubricated air.

Manually-Fed Pneumatic Termination Press

Part Number	
Series 050	CTM64F50FM

Preassembled sockets on tape are automatically fed into the press and into termination position. Operator manually installs cable laterally into socket and actuates the press with a foot switch. Terminated socket is automatically ejected. Operates on 85-95 psi non-lubricated air. 110 VAC – 220 V transformer is supplied with the tool.

High Volume Reel-Feed Pneumatic Termination Press

Part Number	
Series	CTM64F50FRI

Tools

Manual Tool

LCTM

Automatic test and termination of Series 050 female connectors • Modular system – can easily be switched from manual termination to reel-fed termination • each termination is automatically tested; possible sources for misterminations are automatically identified and indicated on an LCD-display • precise alignment of the flat cable by a newly designed positioner • termination process can only be released when cable and connector are properly positioned.

Pneumatic Bench Press For Manual and Reel -Fed Termination with Integrated Connection Tester

Part Number		
Pneumatic Bench Press	For Reel-Fed Termination	For Manual Termination
Series 050	LCTM64F50FRT	LCTM64F50FT

Flat Cable Shears

Part Number	
Flat Cable Shears	FCS3

Series 050 + 057/Press Fit Insertion Die

Part Number	050/057-0□□-3XX
Termination Methods	Straight Tail Press-Fit
Series 050 + 057	200-022-1 □□

□□ = Number of circuits
